### Kapitel 3: Its Not Burden

i sing a song  
about the purpose of passion  
about the street of justice  
the execution of dumb

i just love it  
love it to bring that shit around  
around to the people  
come on and let me see your fist in the air  
and swing your head to the rythem of the guitar

come on lets use break the rules  
of the high society  
break out of the prison  
the prison of lifeless

i just love it  
love it to bring that shit around  
around to the people  
come on and let me see your fist in the air  
and swing your head to the rythem of the guitar

forget the tears  
forget the pain  
remember your good times  
i know that you are better then they think and say

i just love it  
love it to bring that shit around  
around to the people  
come on and let me see your fist in the air  
and swing your head to the rythem of the guitar

born on earth

feadet with the shit  
say they we are the devil  
but they cant see the truth

i just love it  
love it to bring that shit around  
around to the people  
come on and let me see your fist in the air  
and swing your head to the rythem of the guitar

we walk trough hell  
and become a second chance  
we are reborn as archangels  
just to horrific in the mind of our desecrater  
it is just our burdens revenge
